There's almost no substance to this, I wasted an hour of my life on the mission and got cockblocked from a huge nuclear explosion almost destroying the entire island with "Ha-Ha, tis not but a joke!" But, I have to ask, is a doomsday scenario where you get nuked possible?. Possibly the only "multiple endings" game I've ever played where it was actually worth playing the whole game three times, since the gameplay and puzzles change significantly. Interesting and creepy atmosphere, but it's a shame the dialogue and descriptions aren't in better English.. Conceptually a great game, in practice the performance shoots itself in the foot. This game is definitely suffering from a CPU bottleneck. I have an i5 2500k and GTX 1070Ti. This is the only VR title i remotely have any performance issues with. That being said, I don't care how bad the game looks if I can get it to perform well. But no matter what settings I use, 4 player split screen is crawling at 15fps. Not even the AI count has an effect. This causes vr players to feel motion sick. The moment it gets to 2 players, it caps at 30fps and the performance is fine. This game is way more demanding than it should be, and I only say this because I'm a unity developer myself and I've witnessed 4 player vr splitscreen done right. The fact that performance is only an issue with high player count leads me to believe the cpu rendering (maybe drawcall count) is not as optimized as it could be. Without these performance issues this game would be great, but unfortunately you need an overkill cpu to run this game. Until then, I can't recommend this game to the average user.. I absolutely loved this game! Worth every penny. If you loved King's Quest or Quest for Glory, this game is definitely for you!. It's interesting type of game.. Do you like a puzzle games? Yes? So Mousecraft is for You!
Cool combination of Lemmings and Tetris will test your brain from the easiest puzzles to the really challenging ones.

Plus game have a very good and easy level editor!. love this game! it would be awesome if there would be an air assault team that could land on top of a building and begin attack or at a destination you could call in a team and have a helicopter hover over the ground while the unit rappels down the rope. if it could do that over the building it would be pretty cool as well as in an area that could be cleared.

IT IS THE STEALERS OF THE GENES. It's really dumb. It's clearly written by someone for whom English is, at best, a second language. It uses gross-out humor pretty much everywhere.

But darn it all, I don't know why, but I still think it's really fun.. There's about 5-10 minutes total of content here. The info buttons give very little information. Additionally, I stayed in reprojection 100% of the time in this game with a GTX 970, so the optimization is very poor. To add insult to injury, the textures are flat, environment are square, and the sense of wonder is low.

Not worth the $2-3 price point until the performance is fixed, more content is added, and the overall quality is increased.. Great software for 2D animation.. I've played a decent amount on other platforms, and can say without any reservation that this is a fantastic roguelike and a significant upgrade over Cardinal Quest 1.

Class balance and combat seems to be improved, with much more interesting leveling up and upgrades. In Cardinal Quest 1, certain classes felt like easy mode, but the balance is much more in sync this time around. Additionally, there is a lot more gameplay than originally.

If you're a roguelike fan, this should scratch that itch.. A great expansion to the original game, which is a masterpiece. Cameos, a good story, new weapons and enemies.. A wonderful video game based on Chinese mythology, it's just a pity that this all in Chinese, I really look forward to putting the English version at least the subtitles and menus that would be great.. I am very happy that I purchased this game. It plays a lot like Super Metroid and has some Castlevania elements to it, but it also has its own element to it in that it starts out in similar areas but then it branches on its own and becomes a different play through every time. I have not tried the deathmatch or time trial modes yet, but I will say that the people who think this game is clunky haven't picked up enough boost items yet and are probably used to much more modern and less retro style games, because this takes me right back to the 90's and the Super Nintendo days. Definitely pick this one up.
